

Presentation Title: How Success Kills Software Architecture - And How to Prevent it!

Presenter: Don Parker, Klocwork

Brief Bio:

Don graduated from the University of Waterloo in 1978. Over the past 24 years, Don has gained experience in all facets of software development (Development, Design, Architect, Test, QA, Support, Sales, and Management) and been to the brink of "architectural death" and survived!

Don was an early customer of Klocwork tools while working at Nortel. He joined Klocwork in August 2002, and took over the role of Development Director in March 2003.

His motto is: "Let's make NEW mistakes this time!"
