

Presentation Title: Roundtable Discussions on QA

We have decided for the August meeting to do something a little different. Rather than a formal presentation, we will have several round table discussion groups, each on a different QA topic. Each table will have a facilitator there to guide the discussion and a minimum of three others in the group. The discussion will be an opportunity for all to share their knowledge and experiences in an area. After pad-boarding the highlights, each group will do a quick 5 minute presentation to share what they have learned, and then open the floor for discussion.

Some of the suggested topics are:

- Software testing methodologies,
- Quality Assurance practices,
- QAI certifications,
- Testing in a production environment,
- Testing metrics
- Documenting the test process

Please register by August 18th indicating your preferred first, second, and third choice

topics. If there is another topic that you're interested in, feel free to suggest it and we'll see if there are enough for a discussion group.
